Replication Files for "When Harry Fired Sally: The Double Standard in Punishing Misconduct"

Mark Egan, Gregor Matvos, and Amit Seru

June 15, 2021

1 Data Sets:

when_harry_fired_sally_base_data.dta: This data set contains the complete panel data set of financial advisers that were registered with the Financial Industry Regulatory Authority (FINRA) over the period 2005-2015. Observations are at the financial adviser-by-year level. The data were collected from FINRA's BrokerCheck website. The data set also includes gender data from GenderChecker and adviser-level productivity data from Merdian IQ.

when_harry_fired_sally_base_extended_data.dta: This data set contains the complete panel data set of financial advisers that were registered with the Financial Industry Regulatory Authority (FINRA) over the period 2015-2018. Observations are at the financial adviser-by-year level. The data were collected from FINRA's BrokerCheck website. The data set also includes gender data from GenderChecker and adviser-level productivity data from Merdian IQ.

settlements_data.dta: This data set contains details on each financial adviser disclosure reported in BrokerCheck. Observations are at the disclosure-by-adviser level. The data were collected from FINRA's BrokerCheck website.

hazard_data.dta: This data set contains all of the out of the industry spells for all financial advisers that were registered with FINRA over the period 2005-2015. Observations are at the adviser-by-out of the industry spell level. The data were collected from FINRA's BrokerCheck website.

allegations_and_charges: This data set contains the allegations and charges associated with each financial adviser disclosure reported in BrokerCheck. Observations are at the disclosure-by-adviser level. The data were collected from FINRA's BrokerCheck website.

2 Programs:

when_harry_fired_sally_replication.do: This Stata program is used to construct all of the tables and figures in the text.

Allegations-LDA.py: This python program uses Latent Dirichlet Allocation to classify the misconduct disclosures as described in Online Appendix A5.
